Phone no:+91 9440690881 GitHub: https://github.com/BhavanaThota2006/

PROFESSIONAL SUMMARY

Aspiring Full Stack Developer with hands-on experience in building responsive web applications using React, HTML, CSS, JavaScript, and Bootstrap. Proficient in Java and Python (basic knowledge) with practical knowledge of Git-based version control and collaborative development using GitHub.

SKILLS

Languages	:	Java, HTML, CSS, JavaScript, MySQL, Python(basic knowledge)
Tools & Platforms	:	Git, GitHub, VS Code, Google Colab, Jupyter Notebook
Frameworks & Libraries	:	React.js, Bootstrap, AOS, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
Soft Skills	:	Problem-Solving, Strong Communication, Team Collaboration, Interpersonal skills

PROJECTS

SMART WEATHER ROUTING

GITHUB LINK

Technologies Used: React.js, Node.js, Express.js, Leaflet, Tailwind CSS, OpenWeatherMap API, TomTom API, Axios.

- Built a full-stack weather-aware routing app integrating **2 external APIs**, delivering real-time route insights with support for **3 vehicle types** (car, bike, truck).
- Implemented alternative route comparison (up to **2 routes**) with weather-based risk analysis, segmenting routes every **40 km** to compute risk %, avg. temperature, and travel time.
- Developed **3 RESTful APIs** (geocode, route, weather) using Express.js.
- Enabled live GPS tracking with browser geolocation and dynamic map rendering using Leaflet.js, improving real-time route visualization and decision-making.

PERSONAL PORTFOLIO WEBSITE

LINK

Technologies Used: HTML, CSS, JavaScript, AOS (Animate on Scroll)

- Developed a fully responsive personal portfolio website using HTML5, CSS3, JavaScript, and Bootstrap, and designed and implemented **10+ interactive** UI components, including animated skill progress indicators, smooth scrolling navigation, and scroll-triggered animations (AOS), to enhance user engagement.
- Structured 6+ core sections (Home, About, Skills, Projects, Work, Contact) using a mobile-first approach, ensuring **100% responsiveness** across devices and screen sizes. Built and integrated an email-enabled contact form with client-side validation to enable direct communication.
- Added resume download functionality, SVG-based scalable icons, and an interactive mobile navigation menu to improve accessibility and user experience.

SENTINEL NET

GITHUB LINK

Technologies Used: Python, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn

- Developed *Sentinel Net*, a machine learning-based Intrusion Detection System using the NSL-KDD dataset (125,973+ records) with complete preprocessing, feature encoding, and SMOTE-Tomek hybrid resampling, reducing class imbalance by over 60%.
- Trained and evaluated three classification models (Logistic Regression, Decision Tree, and Random Forest), achieving up to **99.2% accuracy** and improving minority attack class detection by **25%** compared to baseline models.
- Reduced false positive rate to below **2%**, enhancing detection reliability for real-world network traffic scenarios.

EXPERIENCE

Artificial Intelligence Intern

Infosys Springboard (13-08-2025 to 08-10-2025)

- Developed an ML-based Intrusion Detection System using NSL-KDD and CIC-IDS-2017 with a full pipeline of preprocessing, encoding, and SMOTE-Tomek resampling.
- Implemented and evaluated Logistic Regression, Decision Tree, and Random Forest models, achieving up to 99%+ accuracy and improved minority attack detection.

EDUCATION

Bachelor of Technology (B.Tech) | CGPA: 9.5 (ongoing)
PBR VITS, Kavali
Expected Graduation: 2027

Intermediate | Percentage:97.5%
Narayana Junior College, Kavali
Completed: 2023

CERTIFICATIONS & ACHIEVEMENTS

- Omdena – Building CropLogic Project Collaboration Certificate (Nov 18, 2025) — Credential Link
- Achieved first place in the coding contest organized by our college on March 24.
- Organized a college-level technical event, “Logic Lockdown,” attended by 150+ participants.
